

Science Fair Welcome Letter

To Students & Families

Dear Students & Families,

Thank you for your interest in the Science Fair! We hope that, with your enthusiastic encouragement, your student will participate in the fair by preparing a project. This will be an exciting experience for your Sea Star!

Grown-up support and assistance is essential to your child's success. A general rule of thumb to go by is:

- 4th and 5th graders should be doing almost the entire science project by themselves.
- 2nd and 3rd graders should be able to do many parts.
- Tk/K and 1st graders will need help for most of the project.

We are confident the following benefits will result from your child's participation in the Science Fairs:

- * Reinforcement of grade level science, literacy and math skills
- * Fostering curiosity, awareness, and creativity
- * Increased scientific knowledge
- * Learning research techniques
- * Growth in ability to work independently
- * Having fun with science!

As last year, we will continue to award grade level Awards of Excellence, selected by our teaching staff. In addition, if there is a project(s) that demonstrates an original and innovative approach/concept, it will be recognized with a Da Vinci Award.

See you at the Science Fair!
